

2017 NRA Collegiate Pistol Sectional Score Reporting Instructions

- (1) Insert the date(s) and location of the sectional at the top of the page.
- (2) Starting on spreadsheet line number 15, in the team section for score reporting, list the four or five members of each team, preferably in descending score order.
- (3) If a team member is also being entered as an individual competitor (along with the payment of the individual entry fee) indicate "T&I" in the indicated column. Team members that are shooting as "team only" competitors should have this space blank. Starting on spreadsheet line number 46, in the section for "individual only" competitors at the bottom of the page, this space is already appropriately marked.
- (4) Competitors that are individual members of the NRA should have their NRA membership number listed. Others should have this space left blank.
- (5) Year in school should be listed as either 1st, 2nd, 3rd, 4th or 5th.
- (6) Month-year of initial full-time enrollment should be listed as shown in the example.
- (7) School name should be listed the exact same way for all competitors from that school.
- (8) Indicate whether each competitor is a member of a college "**Club**" team or shoots as an individual (list "club") while in college, or attends a "**Jr College**". For the couple of programs that are NCAA varsity pistol teams list "**NCAA**", even though for the purpose of NRA collegiate pistol shooting championships this designation does not make a difference.
- (9) Indicate whether the competitor is a current member of a college ROTC program by inserting "**ROTC**" in the space. These individuals will be eligible for both ROTC and Open individual awards at the sectionals and nationals for all events except, potentially, standard pistol. If there are sufficient teams and/or individuals to conduct an ROTC team standard pistol competition at Nationals then that is all that ROTC teams will be eligible to compete for an invitation for, for the national event. If there are not sufficient ROTC entries to hold a national ROTC standard pistol competition then these teams will be eligible to compete for an invitation in the open category. Only one team per academic institution may qualify in each open event. Indicate whether a team of four ROTC individuals is attempting to qualify for the NRA Collegiate Standard Pistol Championship as an ROTC team (and not an Open team), thus being eligible for the ROTC team championship (if sufficient teams enter) by entering "ROTC-T" in all four blanks.
- (10) Indicate the competitor's permanent address or the address to which NRA correspondence is currently being sent. Do not list a temporary school address.
- (11) List an E-mail address where the competitor can be contacted if there are any questions about their entry or if a notification needs to be made.
- (12) List a phone number where the competitor can be contacted if there are any questions about their entry or if a notification needs to be made.
- (13) List the scores fired in the format shown in the example.
- (14) The individual and team totals should be calculated and listed where indicated. The totals at the right side of the page are provided as a check of your calculations. To view the calculation column(s) on the right you may need to slide your viewing position bar to the right as these cells are locked and will not show up if you are just using the arrows or tabs to move around.

2017 NRA Collegiate Pistol Sectional Score Reporting Information

Free Pistol and Air Pistol National Sectional Results Tie-Breaking

The Sectional match program calls for NRA International Pistol rules 15.3 and 15.7(a) to be used in breaking ties in free pistol and air pistol. The first procedure used is by comparing 10 shot series starting from the last one and working forward until the tie is broken. It is highly unlikely that two competitors will have six 10 shot series that are the same so match sponsors will not be asked to report the number of 10's, 9's, 8's, etc., as this info would only be used in the second tie breaking step.

Standard Pistol and Sport Pistol National Sectional Results Tie-Breaking

The Sectional match program calls for NRA International Pistol rules 15.4 and 15.7(b) to be used in breaking ties in standard pistol and sport pistol. The first procedure in the rules (for the first three places) is by having a shoot-off. Since having a shoot-off is not possible to use for the national results of the Sectionals therefore the procedure for 4th place and beyond will need to be used. This procedure is by comparing 10 shot series starting from the last one and working forward until the tie is broken. It is highly unlikely that two competitors will have six 10 shot series that are the same so match sponsors will not be asked to report the number of 10's, 9's, 8's, etc., as this info would only be used in the second tie breaking step.
